let me clear up somethings.a 4efe is about 90 hp.a 4afe is 115 hp.a 4age is 120(old version low compression) and 140 hp(new version high compression).a 4efte is 133 hp at 9 psi boost and in my opinion it is the best upgrade u can do to ur ep70/71 starlet.a 4afe requires more modifications to fit while 4efte requires very little modifications.so go for a 4efte.and a 5efe block will come very late in the modifications list so need for it yet.

The Toyota E engine family is a straight-four piston engine series, and uses timing belts rather than chains. The E engines were the first multi-valve engines from Toyota designed with economy, practicality and everyday use in mind (rather than performance). Like many other Toyota engines from the era, the E engine series features a cast iron block, along with an aluminium cylinder head.

The A Series engines are a family of inline-four internal combustion engines with displacement from 1.3 L to 1.8 L produced by Toyota Motor Corporation. The series has cast iron engine blocks and aluminum cylinder heads. To make the engine as short as possible, the cylinders are siamesed. The 1A engine was only 550 mm (21.6 in) long. The development of the series began in the late 1970s, when ...

As for mods, the common ones are the corolla inlet manifold from the 4efe that they use, full exhaust etc. Best way to get power is to go turbo, but it would be easier just to buy a GT.

The 4EFTE engine that powers the Starlet GT and Glanza produces 135 horsepower at 6,400 rpm and 116 foot-pounds of torque at 4,800 rpm. In the JDM Starlet, this was good for an 8.2-second sprint to 60 mph. In stock form, performance might not be considered stunning by today's standards -- but that's easily remedied.

Hey, pull out a valve spring and take it to a engine machine shop, they'll have a catalog and you'll be able to find matching springs. In the past I've shimmed valve springs to increase tension, but with a bucket motor its very difficult to know if you're going to bind the valve spring and destroy it.

This engine came in the 1st gen Paseos when the 3E-E was in the Tercels. It boasted a 16 valve engine and 18 more horsepower than the same sized 12 valve 3E-E. This makes it a significant step up from the 3E-E, which also makes it a great replacement for those who have had their 3E-E engines die out on their cars.
