Connect Arduino UNO board to your computer. Start Arduino program and from examples choose "ArduinoISP" sketch and upload it to the Arduino UNO board. Make sure you select the correct board name and serial port. After uploading "ArduinoISP" sketch, Please connect Arduino UNO (Work as Master) with the Arduino Nano (Work as target) using SPI bus.

Now if you want to see the actual board layout, the eagle files, the cat files for that, they are available on Arduino.cc and they are harder to read, but you can look at that. But this is not that. This is just a wiring schematic that shows you what components should be connected to what. And what pins should be connected to what pins.
