~~Big History - From the Big Bang until Today | Coursera~~

Big History is an academic discipline which examines history from the Big Bang to the present. Big History resists specialization, and searches for universal patterns or trends. It examines long time frames using a multidisciplinary approach based on combining numerous disciplines from science and the humanities,...

~~SIGN IN - Big History Project~~

Big History: The Big Bang, Life on Earth, and the Rise of Humanity About 100,000 to 60,000 years ago, a species of hominines—bipedal ape-like creatures—began to move out of its home territory in Africa and into the Asian continent. Today, homo sapiens, the descendants of those first hominines—live in nearly every ecological niche.

~~Big History Project~~

~~History of the Big Bang | National Schools' Observatory~~

Beginning about 13.8 billion years ago, the story of the past is a coherent record that includes a series of great thresholds. Beginning with the Big Bang, Big History is an evidence-based account of emergent complexity, with simpler components combining into new units with new properties and greater energy flows.

~~Big History: Connecting Knowledge | Coursera~~

Nearly two decades later, another American historian, Cynthia Stokes Brown, took up the challenge of writing a book about history as Christian had re-conceived it. She had recently retired from Dominican University in California. The result was Big History: From the Big Bang to the Present (2007).

~~Learn Big History with The Great Courses~~

Big History provides us the chance to think deeply about the place of human beings and modern society in the larger scheme of things. It offers a clear understanding of the overall shape of what I'm tempted to call a "modern, scientific creation story," and an understanding of why this story is both important and in some ways very beautiful.
