Current research in the Blanch lab is focused on three areas: 1. Protein interactions: The broad objectives of this research are to develop molecular-thermodynamic descriptions of the behavior of proteins in electrolyte solutions, to provide a framework for the design and optimization of protein separation systems,...

The final part of this study focused on the estimation of the thermodynamic parameters (activation enthalpy and entropy) of this bioprocess in order to make clearer the phenomena involved in both xylitol production and its thermal inactivation. Among the three different approaches reported in the literature...

Biochemical Engineering - CRC Press Book

Biochemical Engineering. This work provides comprehensive coverage of modern biochemical engineering, detailing the basic concepts underlying the behaviour of bioprocesses as well as advances in bioprocess and biochemical engineering science.
