~~Tilapia Production Using Biofloc Technology | pdf Book ...~~

A description of the biofloc and how to “feed” and support the biofloc follows.

The major component of biofloc is heterotrophic bacteria. The function of

Online Library Biofloc File

the biofloc is to reduce the nitrogenous metabolic waste (ammonia, nitrite) produced by shrimp feeding and production.

~~VI Biofloc Production Systems for~~ Aquaculture

Development of biofloc system • It may take a few weeks, depends on the

Online Library Biofloc File

biomass. • First algae develop.
Transition, foam formation then it get brown. • Transition is fast with tilapia, longer with shrimp • Add carbon if TAN is above ~2 mg/l • Adding clay, wheat bran etc. serves as seeding for biofloc formation.

~~Biofloc systems: a ...~~

Biofloc technology is based upon the running of the pond using minimal water exchange, subsequent development of dense microbial population and managing the microbial population through the adjustment of the C/N ratio so that it controls inorganic nitrogen concentration in the water.

Biofloc systems are also most suitable for species that can tolerate high solids concentration in water and are generally tolerant of poor water quality. Species such as shrimp and tilapia have physiological adaptations that allow them to consume biofloc and digest
