Excellent. In my view,
the Colloquial series
has the best
introduction to the
sounds of a language.
Even if one doesn't buy
the book, spending a
few hours with the
sounds of the language
section in a Colloquial
course pays off more
than most. 2 persons

Series was designed to cover groups of books generally understood as such (see Wikipedia: Book series). Like many concepts in the book world, "series" is a somewhat fluid and contested notion. A good rule of thumb is that series have a conventional name and are intentional creations, on the part of the author or publisher. For now, avoid...

these books are easy to use. Whereas the Swedish version has the factual text in Swedish which allows you to immerse yourself in the structure of the language - this Norwegian book has the factual texts in English. It would be nice if the colloquial series had the same conversations in each language book.
