Cahier Technique No 172 Schneider

Cahier Technique Schneider Electric no. 172 / p.6 Fire This hazard, when it occurs, can have dramatic consequences for both persons and property. A large number of fires are caused by important and localised temperature rises or an electric arc generated by an insulation fault. The hazard increases as the fault current rises, and also

Cahier technique-no-114-schneider-electric

Cahier Technique Schneider Electric no. 114 / p.11 3.2 The direct contact risk This risk is the same for people whatever earthing system is used. The protection measures stipulated by standards are therefore identical and use the possibilities offered by the high sensitivity RCDs. This is because: c As the fault current flows through a person in contact with a live conductor, he or she is ...
