flecks or spots of colour on white areas. It can occur on any white area on a dog, so long as the white is "real" white (i.e. so long as it's caused by the >white spotting. series and not by the Intensity gene).. If a dog has the ticking allele but doesn't have any white areas, there will be no visible effect.

FAQ. Q: Where is the color Brown? A:
Brown (and I'm not referring to Seal

Download File PDF Canine Coat Colour Genetics The Miniature Schnauzer

Brown) is a somewhat ambiguous term used to identify a number of horse coat colors but most often refers to a dark variation of Bay. As the genetics behind the variations of the Bay base color become more understood, we will try to make changes to the calculator that will incorporate these variations.
