Walls And Mirrors is a computer science textbook, for undergraduates taking a second computer science course (typically on the subject of data structures and algorithms), originally written by Paul Helman and Robert Veroff. The book attempts to strike a balance between being too mathematically rigorous and formal, and being so informal, practical, and hands-on that computer science theory is ...

Do Programming Problem 6 at the end of chapter 3. The problem refers to Programming Problem 5 of Chapter 1, which you didn't do, but it was just writing out specifications for a "Set" ADT, which is just a slight variation on the "Bag" ADT.

Walls and Mirrors - Wikipedia
The "walls and mirrors" mentioned in the title represent problem-solving techniques that appear throughout the text. Data abstraction hides the details of a module from the rest of the program, whereas recursion is a repetitive technique that solves a problem by solving smaller versions of the same problems, much as images in facing mirrors grow smaller with each reflection.
