Used Ford Focus for Sale in Broomfield, CO | Cars.com

On starting from cold there is a red LED lit (the one to the right of the central LED panel) and a message saying 'engine system fault' on the main display. The yellow engine warning light has not lit at any point. This is intermittent, and does not seem to occur once the engine is up to normal temperature.

Engine System Failure Ford Focus

The early years Ford Focus, 2000 - 2002 are experiencing a catastrophic engine failure that can occur at any time. This problem involves the valve seat on the intake valve of the cylinder head. The valve seat cracks, breaks apart and falls into the cylinder destroying the piston, head and block cylinder wall on the single over head cam (sohc) 2.0 liter engines - VIN 'p'.

Ford Focus Engine Failure Problems - carproblemzoo.com

Ford Focus II (2004 - 2007) - 05 1.6 Engine System Failure on 115PS. Hi folks, Have had intimitent what I would call "stutters" on my Focus occasionally during the 13 months I have had it. (one previous owner, bought at 2.5 year old, 25,000 on clock, now done 42,000). Power loss is similar to someone lightly dabbing the brake, hardly detectable to a passenger but detectable and annoying to the ...

Engine system fault - likely suspect(s)? - Page 1 ...

When Ford asked Firestone to fix the problem, Firestone reduced the weight of the tire about 3%. By 1995, Ford had finally replaced the Explorer's unloved Twin I-Beam with a short-and-long-arm suspension but didn't act on previous recommendations to lower the engine and widen the chassis.

Ford/Firestone Rollover Deaths - StudyHippo.com

3 Answers. Limp mode disables alternating cylinders to cool them with just fuel no spark. If the temp gets to hot , the engine will shut down. You may want to check your coolant level .what temp is your engine running at .Ford has had a problem with the instrumentation cluster as well so you may want to check that out.

SOLVED: Why does it say engine system fault acceleration ...

Ford Focus Problems With Valve Seats The valve seats failed, dropped into the engine and destroyed it. This is a common problem with this engine. I'm very disappointed that Ford never stepped up to the plate with this problem and recalled the car to correct this very serious engine problem.
