Characteristics. A Byzantine fault is any fault presenting different symptoms to different observers. A Byzantine failure is the loss of a system service due to a Byzantine fault in systems that require consensus.. The objective of Byzantine fault tolerance is to be able to defend against failures of system components with or without symptoms that prevent other components of the system from ...

The taxonomy of *Proteus*, *Providencia*, and *Morganella* is a fascinating story that is enmeshed throughout the early history of the evolving science of microbiology. Species within these genera are not considered frank pathogens, unlike some of the other members of the Enterobacteriaceae, and are commonly isolated in clinical laboratories. As with other opportunistic pathogens, they may also cause ...
