### General Electric T700-GE-701 Turboshaft Engine | PowerWeb

GE Aviation's first turboprop application nearly 10 years ago was for aerial application exclusively on Thrush Aircraft's 510G. In this high-performing, rigorous industry, GE's H80 engine proved itself and gained a following among operators who wanted something less – less fuel, less maintenance, lower costs, and lower temperatures.

About the T700-GE-701: The General Electric T700 is one of the most successful turboshaft engines ever built. Since the first T700 (the T700-GE-700) entered production in 1978, the engine has accumulated more than 50 million flight operating hours.

### Technical Manuals Indexes | GE Aviation

We are adopting a new airworthiness directive (AD) for certain General Electric Company (GE) CT7-8A and CT7-9B model turboshaft engines. This AD was prompted by reports from the manufacturer that the high-pressure compressor (HPC) impeller installed on these engines may have suffered from material degradation during the manufacturing process.
