Pedigree Worksheet Interpreting a Human Pedigree Use the pedigree below to answer 1-5 111 Name Period Date I . In a pedigree, a square represents a male. If it is darkened he has hemophilia; if clear, he had normal blood clotting. a. How many males are there? b. How many males have hemophilia? 2. A circle represents a female.

*Pedigree Analysis - University of Notre Dame*

A pedigree is a diagram that shows the phenotype of a particular genetic trait in a family from one generation to the next. Genotypes for individuals in a pedigree often can be determined with an understanding of inheritance and probability. In this investigation, you will use both population sampling and pedigree analysis to observe human traits. Problem

### *Analyzing Human Pedigrees - The Biology Corner*

When working through a pedigree, the first thing you need to do is figure out which characteristic is dominant-the shaded one or the open one. Then you need to choose a letter (let's use A) and begin assigning genotypes. Remember that recessive individuals are always homozygous, so assign their genotypes first. Then go back and look at all of the dominant

Pedigree Worksheet. You can look at a pedigree and determine whether traits are dominant or recessive, and you can also tell if it is sex-linked or autosomal. A sex-linked recessive characteristic is determined by an allele that is carried only on the X chromosomes. The shorter Y chromosome does not carry an allele for a sex-linked trait.

### *Interpreting Pedigree Worksheets - Lesson Worksheets*

An approach, called pedigree analysis, is used to study the inheritance of genes in humans. This session will outline how to construct a family pedigree, and how to interpret the information in a pedigree using Mendel's laws of inheritance and an understanding of the chromosome theory of inheritance. Learning Objectives.
