It is indeed isometric graph paper as advertised, pages are double-sided which is nice. However the lines are quite thick for graph paper (about half a mm) which is a little annoying because I do a lot of my detail work with extra fine pens which don't cover up the grid lines.

The size of the 'Isometric' print is a good standard size and is easy to see and use. I think it would be a good idea to change the advertised picture so that people can see what this paper really looks like; apart from that the paper and the service provided was very good and I would purchase this paper again. Thank you.
