Maps of Time: An Introduction to Big History: David ...

An introduction to a new way of looking at history, from a perspective that stretches from the beginning of time to the present day, Maps of Time is world history on an unprecedented scale. Beginning with the Big Bang, David Christian views the interaction of the natural world with the more recent arrivals in flora and fauna, including human beings.

Maps of Time: An Introduction to Big History. By David ...

As the time scale picks up, he turns to the future, first considering, in an instructive fashion, large-scale human space travel, with humans adjusting to particular local environments, and then, a universe that eventually becomes "no more than a depressingly thin sprinkling of photons and subatomic particles" (p. 491).

MAPS OF TIME

Maps of Time: An Introduction to Big History, With a New ...

Below are brief reviews of the two works. The magnum written opus Maps of Time: An Introduction to Big History is an interesting change of reference from a historical perspective combining the disciplines of physics, cosmology, astronomy, geology, chemistry, microbiology, evolutionary theory, archaeology, politics, religion, economics, sociology, and history into one big area of contiguous study based upon much larger timescales than those traditionally taken in the study of historical time ...

Nonfiction Book Review: Maps of Time: An Introduction to ...

"About 250 million years ago, most of the continental plates were joined into a supercontinent, which Wegener had christened "Pangaea." It was surrounded by a single, large sea, known as Panthalassa." — David Christian, Maps of Time: An Introduction to Big History.

Maps of Time: An Introduction to Big History - David ...

Maps of Time unites natural history and human history in a single, grand, and intelligible narrative. This is a great achievement, analogous to the way in which Isaac Newton in the seventeenth century united the heavens and the earth under uniform laws of motion; it is even more closely compara-

Maps of Time by David Christian - Paperback - University ...

Maps of Time tells the reader: A hydrogen molecule is a less complex structure than an amoeba, which, in its turn, is less complex than a human being. Hydrogen molecules were already there, when there were no amoebae, and human beings came even later into existence than amoebae, while you would expect, according to the second law of thermodynamics, that the order of appearance should be exactly the other way round.
