small number of errors therefore it's normally possible to have the motor operating again within a short period of time.

Maintaining Your Diesel Engine | West Marine

If you own a diesel and do the same thing, you may end up with an engine that's prematurely dead. The same goes for changing filters: A dirty fuel filter can impair a conventional vehicle's performance, but dirty fuel can clog a diesel's fuel injection system, and you may need expensive professional help to get back on the road again.

much more serious in a diesel engine than in gas-powered boats. Since diesels run at piston compressions of 350psi to 500psi, which is three to four times that of a gas engine, heat builds up very rapidly. Within 60 seconds, this high compression builds up a lot of heat that can do damage.

diesel generator troubleshooting

Fuel that isn't fresh can cause problems with keeping a boat engine running. If your fuel source has become exposed to the elements, then contaminated gasoline is also a possibility. Gasoline with too much outside moisture mixed into it will make a sensitive outboard motor a nightmare to get started.

Marine Diesel Engine Starting Problem Troubleshooting
Checklist. Check the battery terminals - are they loose or dirty?
If yes, tight and/or clean them. Check the status of the battery. If
it's not charged and can be charged, charge it. Otherwise, check
to see if it needs to be replaced. Do not rely on a green indicator
as we did.
