MCMI-IV. Signifies percentage of normative population that scored at or below a given BR score. BR transformation tables are available for Personality Pattern, Clinical Syndrome, validity, and facet scales. Because MCMI-IV scales have varying distribution shapes, the relationship between BR scores and percentile ranks varies across scales.

[The MCMI-III in child custody evaluations: A normative study](#)

MCMI-III reports were normed on offenders who were in the early phases of psychological screening or assessment to predict how well they would adjust to prison. Respondents who do not fit this normative correctional population or who took the MCMI-III test for other clinical purposes may receive inaccurate reports.
