First published on TechNet on Nov 03, 2013 Hello, everyone! Roger Osborne here with an update on my Hyper-V Best Practices blog for Server 2012. It has been around 7-months since the initial posting, and might I say the response has been (and continues to be) A-MAZ-ING !In my humble opinion, the interest surrounding my blog points directly to the volume of small, medium and large (Enterprise ...

My Ubuntu Server is running on Microsoft Hyper-V 3.0 on a Server 2012 host machine so adding all the new hardware was as simple as a few clicks. Normally I am a command-line guy but this server is going to be managed ongoing by folks who are less Linux savvy so I wanted to install some additional software that would make their life easier.
