A dictionary file. dict_files/eng_com.dic This class can parse, analyze words and interprets sentences. It takes an English sentence and breaks it into words to determine if it is a phrase or a clause. It can also counts the total number of words in a sentence, checks if a word is a palindrome and can generate a new sentence with almost the same meaning using synonyms and other...

Chemistry Study Guide for Gases

Most substances can exist in either gas, liquid, or solid phase under appropriate conditions of temperature and pressure. The phase that we see under ordinary conditions (room temperature and normal atmospheric pressure) is a result of the forces of attraction between molecules or ions comprising the substance.

This introduction to logarithms is basically a compilation of a lot of ideas I found on the Internet. The Loop Trick was stolen from Square Root of Negative One Teach Math. Another memory device was stolen from Zook Tutoring. Additionally, I stole Until Next Stop's Secret Method of teaching logarithms.

Redox practice worksheet

A gas is a state of matter with no defined shape or volume. Gases have their own unique behavior depending on a variety of variables, such as temperature, pressure, and volume. While each gas is different, all gases act in a similar matter. This study guide highlights the concepts and laws dealing with the chemistry of gases.
