Drawing on the success of \"XS\" series, \"Nano House\" presents 43 examples of the most innovative, most ingenious and most responsible designs for small-scale (less than 75m²) houses set in a variety of contexts. Each house, shown in texts, photographs and plans, is an object lesson in domestic design.

A nano house is a super-small house, generally between 300 and under 1,000 square feet. This book shows off nano houses from all over the world with different goals in mind, from an eco-friendly retreat that blends in with the surroundings to pod buildings that could be assembled into space-saving towers in the city to more traditional house boats.

A small book concerned with small structures aiming for a big impact, Nanohouse: Innovations for small dwellings by Phyllis Richardson contains a comprehensive overview of the benefits in designing small houses. Nanohouse is a small book, mirroring its subject, but it explores how to reduce the footprint of a house to an extreme while

maintaining habitability
in much detail.

Nano House Innovations For Small Dwellings

I bought this book for my father as a Christmas gift. He's an amateur architect and loves the nano house movement. The pictures and articles in the book are fantastic and definitely give great ideas on how to live in a small space.
