M GEOGRAPHIC LIMITS AND CAUSAL AGENTS OF DIPTERA ENDEMISM ...

Introduction. Most species of Drosophila belonging to the Neotropical guarani group are readily recognized by their dark brown body and by having wings with clouded main crossveins. The guarani species group was proposed by Dobzhansky and Pavan (1943: 66) and is currently (Bächli, 2017) composed by 16 species: Drosophila alexandrei Cordeiro, 1951, D. araucana Brcnic, 1957, D. cuscungu Vela ...

Abstract. New replacement names and synonymies are proposed for Neotropical Tachinidae, mainly from Brazil. The following 13 new replacement names are proposed for junior secondary homonyms: Jurinella neobesa, new name for Jurinella obesa (Townsend, 1928) (preocc. Wiedemann, 1830); Archytas wulpianus, new name for Archytas nigrocalyptratus (Wulp, 1888) (preocc.
