realise their potential by providing Applied Behaviour Analysis training and support to their parents and carers.

Parents Education as Autism Therapists | NICVA

Parent Participation Training. One of the most meaningful conversations you will have with your clinical team is the importance of parent participation. It has been proven that parents who are actively involved in their child's therapy often see more progress in their children. At home, it's important to reinforce skills your child is learning in therapy by incorporating them into his or her daily routines.

Autism: Therapy For Parents with Autistic Children

I went home and called his physical therapist and occupational therapist - people who were with him every week and knew him well. They, too, disagreed with the diagnosis and I felt vindicated! I wrote the doctor a two-page letter telling her she didn't know my child and it wasn't fair for her to label him after an office visit.
