All parts of a ship have different names, the names vary depending on what type of ship it is. In this article about ship design, learn what are the parts of a sailing ship and what are the functions of each of these parts. Sailing has to be fun but that can only be so, if good components are used with the best possible materials.

Viking Ship Anatomy Worksheet - TeachEngineering

The response that came back was "that they were all equal!" At the end of the Viking age, Kings set up a levy system for home defence, where everyone in a town or village was responsible for the upkeep of a "local" ship; it's thought that one of the Viking ships found blocking the entrance to Roskilde harbour was one of those.

Viking Boats by Iizbiz2 | Teaching Resources

Viking longships were used in battle, and were long, light, and slender so they could move around quickly. They had a square sail and a mast, but could also be rowed if there was no wind. Depending on its size, a longship had 24 to 50 oars. The prow, at the front of the ship, was often adorned with a dragon or snake head.

Viking Sea Deck Plans, Diagrams, Pictures, Video

The Vikings were great seafarers, creating many unique Viking ship designs. However the master shipwrights never used drawings to record their designs preferring to keep them in their heads. They sailed on their long ships from their native Scandinavian countries around the coastline of Western Europe, trading goods but mostly raiding the towns around the coasts.

Viking Ship Anatomy Worksheet Answers - TeachEngineering

The Leif Ericson Viking Ship, Inc. is a 501(c) 3 nonprofit educational organization dedicated to the study, education and promotion of the fact that Leif Ericson was the first European to set foot upon and explore the North American Continent and of Vikings in general, their times and travels throughout the world.

Parker Pto Pump Diagram | Diagram

The speed diagram is a polar diagram, i.e. "a circular system of co-ordinates" – with the wind's eye, the direction from which the wind is blowing, as zero (upwards) and one of the axes increasing 180° in each direction. The second axis of the co-ordinate system departs from the centre and shows the speed of the ship on the given course to ...
